2. Charts Management

Open New Chart: choose a corresponding product on the Market Watch Window, right-click on mouse - Chart Window

Hide/Show Grid: Right-click on the market watch window - Grid

Chart Type: Choose respectively on the tool bar  for Bar Chart,  for Candlesticks and  for Line Chart.

Chart Zooming: Choose respectively on the tool bar  for Zoom in and  for Zoom out.

Switch on/off Auto Scroll: Choose  on the tool bar to enable/disable automatic shifting of the chart to the left after a new bar has started to form.

Chart shift: Choose  on the tool bar to shift the chart to the left for a better view.

Period Change: Choose  on the tool bar for period selection to view the chart in different periods.

Scrolling, Auto Scrolling, and Shifting of the Chart: Use scrolling function, if screen could not show all the required data. Scrolling is moving of price data to the right/left in the chart that can be performed by cursory keys of the keyboard, or with the mouse. One moves the cursor to the right/left when holding the left mouse button pressed on any point of the chart. “Auto scroll” is intended for users to have the latest bars before their eyes constantly. If this option is enabled, the chart will be automatically scrolled to its end part. If “Auto Scroll” hampered one’s examination on historical data, press F8, unclick “Chart Auto Scroll” under the “Common” tap on the pop-up “Properties” window.

3. Line Studies

Click on  on the tool bar for 5 choices of line studies.

Double click left button on the mouse on the line and threshold points will appear for edition. One may delete or change property settings to adjust the line.

4. Technical Indicators

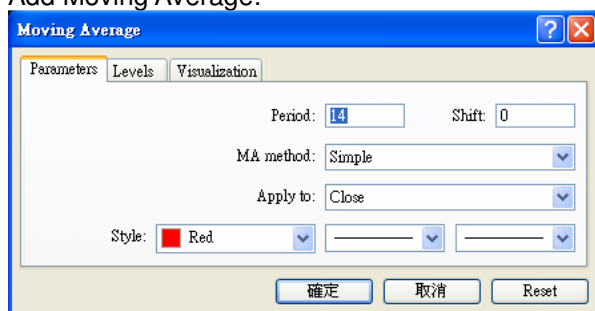

Click on  on the tool bar to choose over 30 technical indicators. Or press “Insert” on the main menu - Technical Indicators.

Add MACD:

MACD Parameters dialog box showing settings for Fast EMA (12), Slow EMA (26), MACD SMA (9), and Apply to (Close). It also includes checkboxes for Fixed minimum and Fixed maximum, both set to 0. Buttons at the bottom include 确定 (OK), 取消 (Cancel), and Reset.

Add Moving Average:

Moving Average Parameters dialog box showing settings for Period (14), Shift (0), MA method (Simple), Apply to (Close), and Style (Red). It also includes buttons for 确定 (OK), 取消 (Cancel), and Reset.

5. Change Colors On Chart

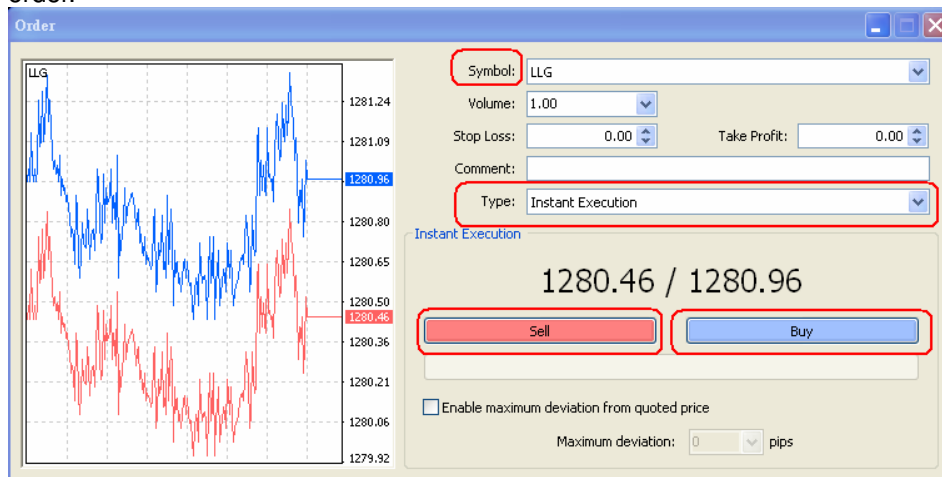

Right click on the chart and choose “Property” or press F8. It can be used for setting of the color of various elements on the chart

3. Trading and Related Functions

1. Order Type: Market Order

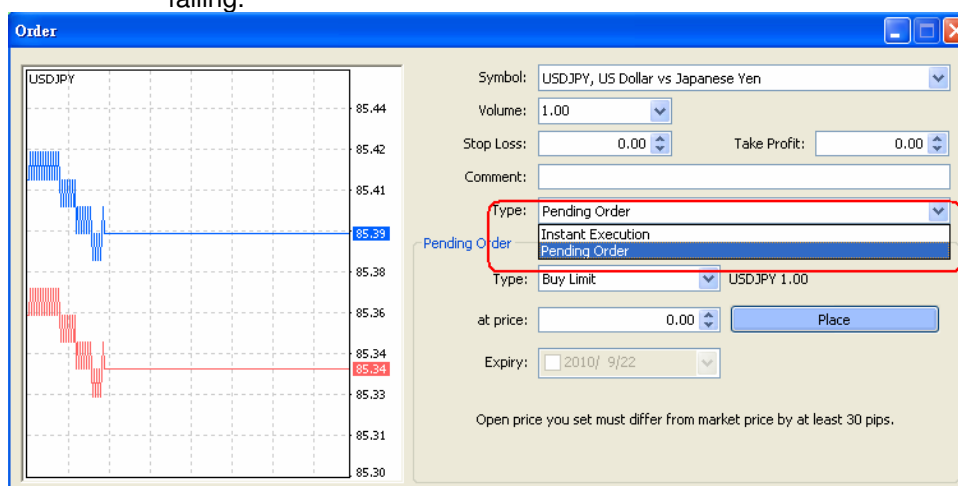

Click on  New Order on the tool bar to open trading window and choose a security under the “Symbol”. Or double click any security on the market watch window for quick execution. Then click on either the red button “Sell” or blue button “buy” to trade according to the bid and ask prices on the left. It is recommended that stop-loss value should be entered for risk control when opening a position in order.

2. Order Type: Pending Order

Click on  New Order on the tool bar to open trading window. Or double click any security on the market watch window and choose Type of execution, enter a price for the pending order, and click on "place". One may set values for both "stop loss" and "take profit" on a pending order.

- Buy Limit:** Buy provided the future "ASK" price is equal to the pre-defined value. The current price level is higher than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having fallen to a certain level, will increase;
- Sell Limit:** Sell provided the future "BID" price is equal to the pre-defined value. The current price level is lower than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having increased to a certain level, will fall;
- Buy Stop:** Buy provided the future "ASK" price is equal to the pre-defined value. The current price level is lower than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having reached a certain level, will keep on increasing;
- Sell Stop:** Sell provided the future "BID" price is equal to the pre-defined value. The current price level is higher than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having reached a certain level, will keep on falling.

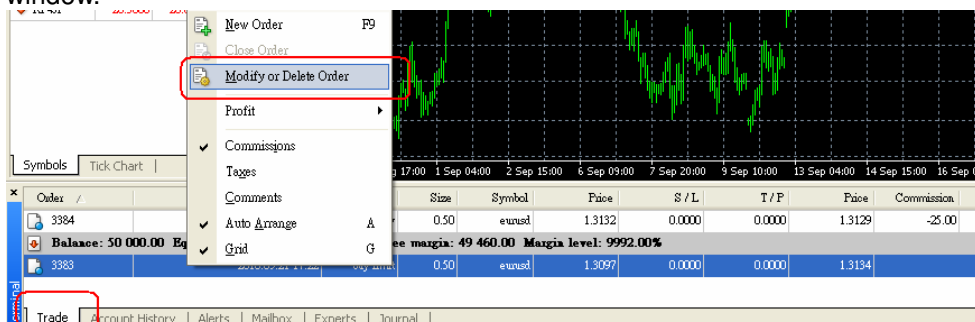

3. Explanation of Pending Order On Chart

Both executed pending orders and standby pending orders will show their status on the chart in the way below.

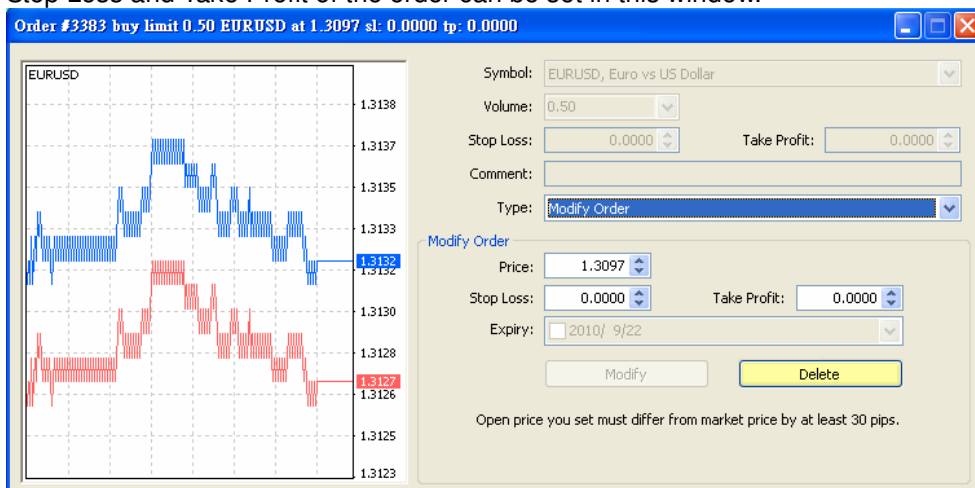

4. Modify Pending Order

Right click on mouse to modify or delete executed pending orders in the "Terminal -Trade" window. The window for order managing will open. Only new Stop Loss and Take Profit can be set in this window.

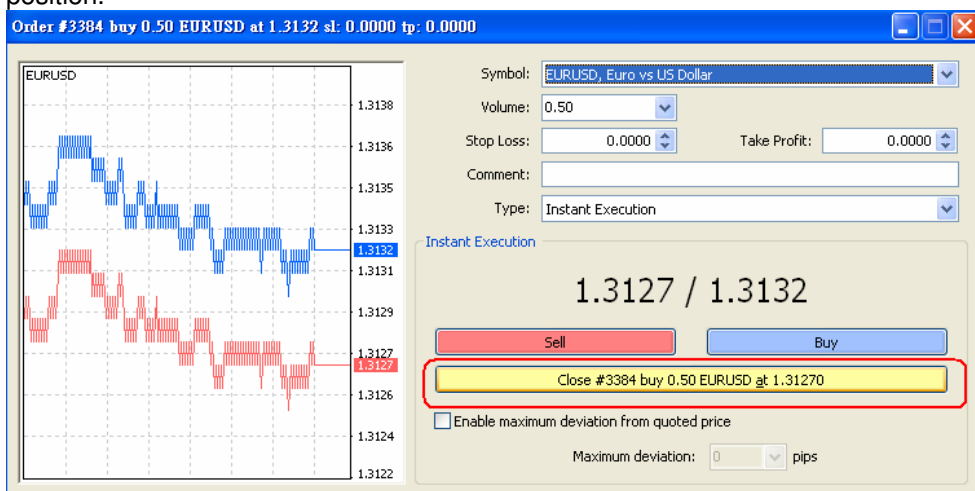

In the "Terminal - Trade" window, Right click on mouse to modify or delete standby pending orders. The window for order managing will open. New price of the pending order triggering and new levels of Stop Loss and Take Profit of the order can be set in this window.

5. Close Position

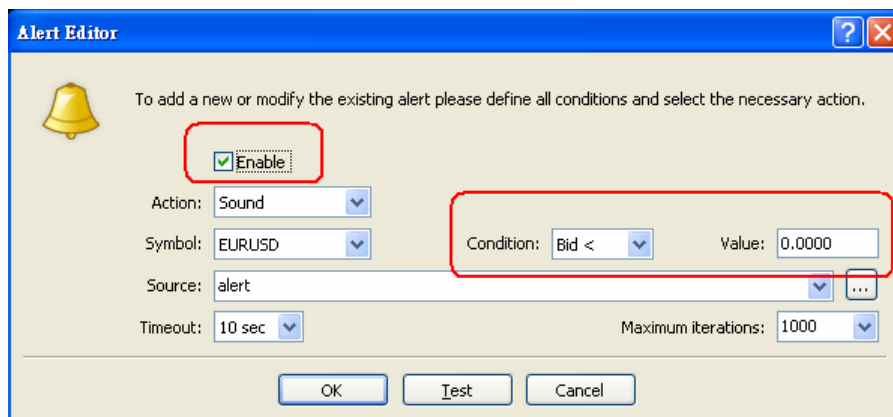

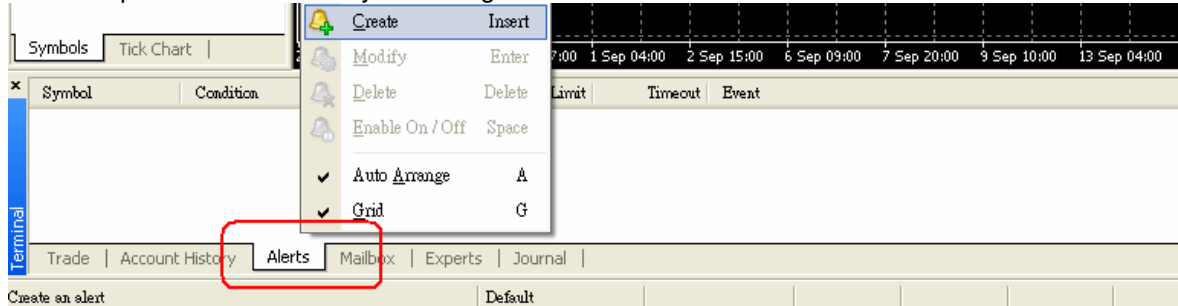

Double click on this position, the window will pop up, click on the button as shown below to close a position.

6. Price Alert

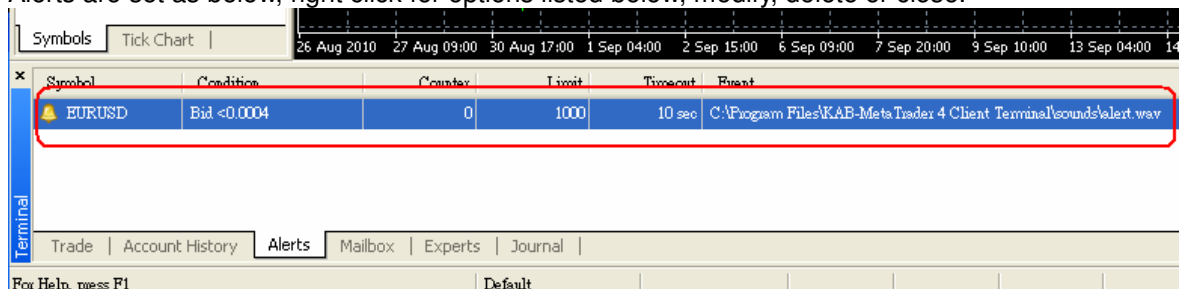

Price alert is a very useful opportunity signaling tool for traders, not worrying about missed trading opportunity.

Alert setup is shown in the way below: right click “Alert” tab in the “Terminal - Trade” window.

One can choose alert sound in the execution board.

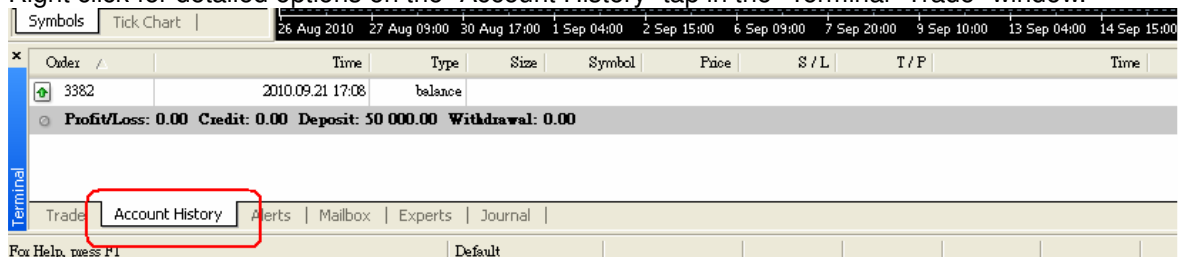

Alerts are set as below, right click for options listed below, modify, delete or close.

7. Account History

Account history is checked as the way below:

Right click for detailed options on the “Account History” tab in the “Terminal -Trade” window.

4. E-mail and Journal

Email Tab

Clients may contact KAB through emails under the Email tab. Clients should always check their mailbox in case of emergent info and notices. The tab contains all messages sent from KAB. Clients can view all the message content by double clicking with left button on a selected message. Click on “delete” to erase a selected message. And clients can send messages to system maintainer and technical support department through the tab. Choose “create” to create a new message.

Journal Tab

“Journal” tab includes all current trading activity info from the client in the client terminal. All info will be deleted after the client quit using the software for a certain amount of time. All of client’s trading activity info during trading period is shown in the tab. To view historical info, right click and choose “Open” and select the appropriate file.

5. Other Functions

The function of MT4 is powerful and vast, press F1 on the MT4 interface to bring out MT4’s own detailed user manual for further understanding and operation in MT4.
